If we're fast becoming just another run of the mill city, perhaps this reminder of the potential of super graphics (already sent to the Mayors Office with the usual zero value routine response) might be apt?

If so, please suggest how I might better send it, Jer. (To more people?)

See you at the rally--from the back of the crowd that's sure to be there. And listening to your eloquent words.

What about waiting a little?

Bigger & better-- super graphics!

You can get many times more, on train billboards. And they just hurt for a little while, before quickly vanishing.

(Shot last mo, in Phoenix)
